A heatmap showing the distribution of debris counts for different debris sizes. The x-axis is labeled 'Debris' and ranges from 0 to 20,000. The y-axis ranges from 0 to 20,000. A color bar on the right indicates the count, ranging from 0 (dark blue) to 1,500 (yellow). The distribution is highly concentrated at low debris counts (below 5,000) and low debris sizes (below 5,000), with a few scattered points at higher values.
