

# 1 PNAS Template for Supplementary Information

2 This PNAS template for Supplementary Information (SI) may be used to organize your supplementary material. **Once**  
3 **formatted, this first page should be deleted by removing the \instructionspage command.** The template is  
4 intended to provide a clearly organized PDF file that will ensure readers can easily navigate to sections or specific figures and  
5 tables. Movie files or large datasets can be presented as separate files. Further information is available in our [Information for](#)  
6 [Authors](#).

## 7 Using the template

8 Specify the title, author list, and corresponding authors with the `\title`, `\author` and `\correspondingauthor` commands.  
9 The cover page will be automatically generated with the relevant description of the SI, by the `\maketitle` command.

10 Figures should be placed on separate pages with captions set immediately below each figure. Table captions should be  
11 set immediately above each table. Note that tables extending beyond the width of the page can be included in the PDF or  
12 provided as separate files. Oversized/nonstandard page sizes are accepted as part of your SI appendix file.

13 References cited in the SI text should be included in a separate reference list at the end of this SI file: (1) and (2).

## 14 Submitting SI

15 Delete this first page by removing the `\instructionspage` command, and then save your completed SI file as a PDF for  
16 submission, following instructions available [here](#).

17

## 18 **Supplementary Information for**

19 **Your Main Manuscript Title**

20 **Author1, Author2 and Author3 (Complete author list)**

21 **Corresponding Author Name.**

22 **E-mail: author.two@email.com**

### 23 **This PDF file includes:**

- 24     Supplementary text
- 25     Figs. S1 to S2
- 26     Table S1
- 27     Captions for Movies S1 to S3
- 28     Captions for Databases S1 to S2
- 29     References for SI reference citations

### 30 **Other supplementary materials for this manuscript include the following:**

- 31     Movies S1 to S3
- 32     Databases S1 to S2

33 **Supporting Information Text**

34 **Subhead.** Type or paste text here. This should be additional explanatory text such as an extended technical description of  
35 results, full details of mathematical models, etc.

36 **Heading**

37 **Subhead.** Type or paste text here. You may break this section up into subheads as needed (e.g., one section on “Materials”  
38 and one on “Methods”).

39 **Materials.** Add a Materials subsection if you need to.

40 **Methods.** Add a Methods subsection if you need to.

**Fig. S1.** First figure

Fig. S2. Second figure

**Table S1. This is a table**

Species	CBS	CV	G3
1. Acetaldehyde	0.0	0.0	0.0
2. Vinyl alcohol	9.1	9.6	13.5
3. Hydroxyethylidene	50.8	51.2	54.0

41 **Movie S1.** Type caption for the movie here.

42 **Movie S2.** Type caption for the other movie here. Adding longer text to show what happens, to decide on  
43 alignment and/or indentations.

44 **Movie S3.** A third movie, just for kicks.

45 **Additional data table S1 (dataset\_one.txt)**

46 Type or paste caption here.

47 **Additional data table S2 (dataset\_two.txt)**

48 Type or paste caption here. Adding longer text to show what happens, to decide on alignment and/or indentations for  
49 multi-line or paragraph captions.
